

TecNiq was one of the first companies to produce a rotation-insensitive mini-PC lamp in this popular format. Working with a major manufacturer, our engineers needed to meet a significant thermal and optical design challenge when the most sophisticated competitors were failing. The world-leading efficient S34 marker lamp was born. The high impact polycarbonate body filled with our unbelievably tough urethane, makes this light nearly hammer proof. **See www.TecNiqInc.com for more details and a complete list of part numbers.**
